

Dear Sponsor,

We are thrilled to share with you that the Long Island Game Farm is now part of an international program dedicated to wildlife research and conservation. With the installation of a Motus Wildlife Tracking Tower, we join thousands of tower sites worldwide observing migration patterns of birds and flying mammals. The Long Island Game Farm's site is critical to further understanding migratory bird routes. The Motus tower will provide invaluable data, enabling researchers to track small birds, bats, and insects, giving us unprecedented insight into their migration patterns and habitat usage across Long Island and beyond. Learn about Motus at www.motus.org

This is a significant milestone and such an exciting time for the Long Island Game Farm and our partner, Foundation for Wildlife Sustainability. We'd like to invite you to be part of the excitement. We invite you to sponsor and attend the unveiling of our new Tower.
